Grande Prairie Warehouse Forklift Safety Training

Grande Prairie Warehouse Forklift Safety Training - The corporation would face claims for liability when damage and injuries are sustained in an accident at the workplace. Warehouses can be a dangerous place to work for its staff, making employee safety a top priority for the business. Warehouse safety training is among the most effective methods to protect personnel, while minimizing expenses associated with injuries and accidents.

The warehouse holds large amounts of stock and materials which can pose dangers, especially when these are being moved. The moving of stock using a powered equipment or manually can lead to injuries the employees' fingers, hands, feet and toes. Falling, slipping and tripping are common causes of injury. Heavy objects could fall off shelves and harm workers. Forklifts and other equipment carry inherent risks as they manipulate heavily laden pallets. Incorrect lifting is a common source of back injuries. Even nails, splinters and box cutters can result in harm.

Warehouse conditions can change from one moment to the next, depending on the substances or materials being handling, the job being performed and the machinery being utilized. Because of the wide variety of potential hazards in warehouse environment, warehouse operations are regulated by many different standards. There are regulations for storage and material handling, for working and walking surfaces, and rules governing the use and selection of PPE (personal protective equipment).

Many warehouse safety regulations are common sense. Here are several examples of warehouse regulations all employees must be familiar with:

1. When working in a warehouse, safety is a top priority at all times.
2. PPE, like for example safety shoes, gloves, eye protection and hard hats, must be worn as appropriate.
3. Possible hazards must be checked and reported.
4. Know warning signs and signals - and follow them.
5. Watch where you're going and concentrate on what you're doing.
6. Pay attention to the work that others are doing nearby, particularly when they are working with forklifts and various hazardous machinery.
7. Make sure that stacked products and materials are secured and stable.

To ensure a safe warehouse, employees must adhere to good housekeeping rules. Basic rules for housekeeping involves keeping the floors and aisles clear of things such as wires and cords. Never perch things insecurely on a surface. When spills take place, clean up at once. Dispose of trash in correct containers. Keep fire extinguisher, sprinklers and fire exits accessible. Put box cutters and other sharp tools away immediately after using. Report tripping hazards like loose or damaged flooring.
