Grande Prairie Counterbalance Forklift Training

Grande Prairie Counterbalance Forklift Training - Counterbalance Forklift Training courses are always in high demand. The Counterbalance forklift is a forklift that is made with a weight which counters the balance, equally distributing the weight of the load across the arms of the forklift. Counterbalance forklifts are designed so the weight behind the center of gravity is counterbalanced by the weight on the lift. The load is projected out from the equipment's front so it is visible to the operator of the forklift. This particular kind of forklift truck should just be used on stable, level ground or on a prepared surface.

Training is necessary for forklift operators to know the proper method to distribute the load evenly across the forklift arms. Trainees would know how to raise and lower the load vertically and how to tilt the mast of the forklift both forwards and backwards between 5 and 15 degrees. Trainees would know the RTITB standards required for safe forklift operation. Individuals training would also become familiar with the types of attachments for the forklift arms.

Kinds of Counterbalance Forklifts:

Walkie Pallet Trucks
The counterbalance forklift referred to as the Walkie Pallet Truck is best suited for getting into areas that are both cramped and small. This particular lift is really maneuverable and can access practically whatever tight space.

Walkie Stackers
The Walkie Stacker is another forklift which differs a little form the Walkie Pallet truck in terms of its lift height. This machinery is designed to access tighter spaces and has extra lift capabilities for high stacking. Neither of the Walkie line of lifts could be ridden. The driver has to walk behind them.

Rider Pallet Trucks
Rider Pallet Trucks are made to be ridden. These riding lifts are perfect for dock loading and unloading.

Wave Work Assist Vehicle
The Wave Work Assist Vehicle is a counterbalance forklift meant to reach great heights of as much as 17 feet.

Sit Down Counter Balanced Trucks
The Sit-down Counterbalance Forklift is built in four-wheel and three-wheel forklift designs. These tough and durable trucks are made to be ridden.
