

## **Grande Prairie Aerial Lift Training**

Grande Prairie Aerial Lift Training - An aerial work platform is a mechanical access platform. This particular machinery provides access to otherwise inaccessible places for equipment or people. Likewise known as an aerial device or elevating work platform, the device is normally utilized to be able to access high areas. Construction and maintenance employees usually need to use aerial work platforms on the job. Firefighters make use of them for emergency access.

Intended for temporary application, aerial work platforms are distinguished from elevators, that provide permanent access to high areas. An aerial work platform is designed to be operated by one person, and is capable of lifting weights of not more than one ton. Some types have load limits which are higher. There are various types of aerial work platforms; like for example, there is a "scissor lift" and a "cherry picker".

Various aerial work platforms come equipped together with compressed air connectors for power tools or electrical outlets. For specialist jobs, such as lifting frames for window glass, an aerial work platform could come together with special equipment.

Those who would like to operate an aerial lift device must undergo training. Normally, the members of a Health & Safety Committee and their representatives are responsible for the inspection of each and every equipment and work places and are likewise required to go through training. People training would know aerial lifting device operation. They will likewise know the rules that apply to safely using these machinery. Rules differ in various provinces, and within federally regulated worksites.

Workers who work near or are required to be lifted by an aerial lifting machine must know all the potential hazards. In a general safety session, an Aerial Lift Training Video could be shown to be able to educate all of the workers who work near them or are lifted by them.

Aerial Lift Training Program includes modules focused on the following: Hazard Identification; Aerial Lift Devices and Operating Controls; Platform Positioning & Park Positioning and Pre Operational Checks for Aerial Lift Devices. The program is designed to train employees on the safe use of boom-supported, self-propelled elevated work platform and self-propelled, elevated work platform. A certificate will be given to employees who complete the program, signed by someone qualified to be able to verify successfully finishing a hands-on practical evaluation.
