Grande Prairie Aerial Lift Train the Trainer

Grande Prairie Aerial Lift Train the Trainer - The train the trainer program designed for aerial lifts helps to teach the trainers how to safely train prospective operators in an industrial setting. Trainers would be provided with in-depth instruction about the workings of aerial lift equipment. The program is offered on an open enrollment basis and delivered at select training places. Before the certification, trainers are assessed and scored on their knowledge and demonstrated skills.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the top training provider within the industry, we offer top notch hands-on training. We provide plenty of chances to practice the techniques and concepts which are learned in the classroom. Along with hands-on experience, trainers develop general knowledge of instructional techniques and machine theory, classroom and field communication skills, and ability to successfully train and evaluate operators. Trainers will gain an understanding of what traits make a successful trainer.

The Aerial Lifts Train the Trainer Program likewise teaches the right techniques needed to express the right information in the classroom and field environment. There are three factors of machine operation that the trainer must learn how to convey to operators: what to perform; how to do it; and why it must be done.

The program provides up-to-date, detailed reference material to help trainers convey the subject matter to equipment operators. Manuals include detailed information on all aspects of industrial mobile machine operator training. Included in the package are training aids which provide a visual reference to improve the learning experience. The equipment-specific training products contain essential materials for both the operator and the trainer: overhead transparencies, videos/DVD's, safety message posters, equipment models; digital training aids and stability pyramid.
